

In spite of Winston Churchill's explanatory speech in the House of Commons defending the strategy that resulted in the loss of Crete, considerable dissatisfaction still exists among those army units which were concerned in this engagement. This dissatisfaction is spreading with increasing bitterness throughout the British Isles. Mr. Churchill complained, with some petulance, of the small-mindedness of those who demand an explanation of every episode of the war. The British press, however, reminds the Prime Minister that Crete was more than an episode—it was a treasured possession which the British had fought for. Mr. Churchill himself had promised to "defend to the death." All this criticism, it should be noted, will be swelled to an intolerable volume should the British, which appears unlikely, suffer any eventual reverse in Syria.

There is no tendency in Britain to ask for the retirement of Mr. Churchill. There is a strong demand for the retirement of some of the weaker ministers.

Specific discontent in the army and in the Royal Air Force centres about certain changes necessary in the civilian planes being supplied.

Plots want more guns in these machines.

They want the British type of gun night.

They want the British "automatic" motors so that planes will not stall in the midst of combat by excited young fliers.

These soldiers and pilots wonder why air support should not be sent to meagre in Crete after Lord Beaverbrook has announced that Britain now possesses all the planes necessary to replace any German effort.

These men, who for twelve days, did impossible deeds, receive no disturbance the answer to their pleas that the improvements they want are impossible.

There is a general feeling in Britain that production of munitions and supplies has not yet swung into the war time tempo of doing impossible things at an impossible rate.

Anxious speculation centres this week about the consequences of the Syrian campaign which was rendered mysterious in its earlier stages, by the apparent disinclination of the State to participate in it.

This German reticence was partially explained in three ways.

First, it was reported that the Germans considered Syria too far from their air bases, to be made the scene of successful operations by the Luftwaffe. They did not want to undertake an engagement in which they might get defeated.

Secondly, they desired the French to bear the whole weight of the defence so that they would be forced into open warfare with the British.

Thirdly, the Germans wanted to see Syria fall to the British, so that the Italian-Syrian in the United States would have material for further propaganda against rendering American aid to Britain while she was up to her old "imperialistic and aggressive" tricks.

Here is a significant corollary to one of these "explanations": It is true that the German fear to engage the British in Syria because they believed they could not get their fighting planes into the theatre of war. But this is a principle of their strategy not to attempt invasion where they do not control the air.

Such a principle would explain their failure to attempt the invasion of Britain.

Moreover, adherence to this principle would render an attempted invasion of Britain an impossibility since there is not the remotest chance of the Germans ever gaining control of the air over Britain.

To some extent, the British march into Syria has tended to revive the flagging energies of American Britons.

But these latter ladies and gentlemen have been treated to a series of lectures by the United States which have had the wholesome respect for the

British will.

There is a strong demand for the retirement of some of the weaker ministers.

All Councillors Present At Regular Meeting

The regular monthly meeting of the Council of the Municipal District of Carbon was held on Tuesday, June 10, having been postponed from the regular meeting date of June 3 on account of impassable roads at the time.

Councillors McEwan, Guyon, J. J. Ohlhauser, Crowell, Offer and Olsen were all present and considerable time in the business such as hospital accounts communications and general accounts were dealt with in the usual manner.

E.M. Brown, M.L.A., and members of the Municipal District of Norquay No. 29, and Councillors of the Village of Carbon, were present to further discuss the formation of a Health Unit, but nothing definite was decided.

The representatives from Norquay Municipal District, present were the Districts of Carbon, Grasswood, Norquay and Keoma form a Unit and they also presented that a meeting be held at Carbon in the near future and have a representative of the Department of Health explain the operation of Health Units, but this matter also was left undecided.

A communication from Premier Albert Edwards advised that the necessary Order-in-Council was passed, granting Municipal Councils authority to invest their surplus funds in Victory Loan Bonds.

At the regular meeting, however, has no surplus funds so the communication was ordered filed.

The executive of the Carbon Community Improvement Fund wishes to advise teachers and others interested that arrangements can be made where by schools and other organizations can have use of the pool, park and picnic grounds for the nominal sum of ten cents (10c) per person, young and old.

Ardelbank school has already arranged to hold their annual picnic at Carbon, and no doubt other schools in the district will do likewise.

Users of the pool are also advised that tickets for the season are now due and payable. A strict enforcement of this rule is to follow and tickets must be purchased before swimming.

**NEW PRICES AT THE CARBON THEATRE**

"Rusty" Hansen announced that the following admission prices are now in effect at the Carbon Theatre. The advance price is set at the new 20 per cent tax on theatre tickets.

Adult tickets ..... 45c  
Children, 12 to 16 ..... 35c  
Children under 12 ..... 15c

His powers assumed by President Roosevelt under his emergency proclamation.

## Origin Of Wall Paper

In Early Days People Hung Draperies On The Walls

From earliest times man decorated his caves with rude drawings and paintings of animals and gods. This is the first "interior decorating" of which we are aware. The ancient Greeks, even though they had walls of lovely marble, hung silk draperies over them for decoration.

In later times kings and nobles would intricate tapestries to record historic events to decorate their walls and to keep out draughts which came through holes in the walls of their marble, hung silk draperies, but used paper as a substitute. Often this paper was spotty. It made no pretense at matching either in color or design, but was put on haphazardly. In time the paper was painted, then printed with pictures of birds, beasts, flowers and scenery. It is said that George Washington, with the aid of his guest, Lafayette, hung some paper for Martha Washington.

## Not Taking Any Chances

Switzerland Keeps Troops On Guard In Case Of Emergency

Optimistic little Switzerland, in the midst of blood-dripping Europe, reports that they are trying to remain "an island of peace, and the centre of various institutions whose aim is to form ties between the nations, to improve their mutual understanding, to unite their efforts for their common good and to defend together the superior interests of the human community." However, their optimism does not go so far that they will draw their troops—numbering 500,000—from the borders. Every pass in the mountain fastnesses of the little republic is guarded, every bridge and railway tunnel mined. Those who try to take Switzerland will find the price dear. Yet those in need find it very easy to cross in to Switzerland. The headquarters of internationalism in Red Cross is at Geneva—64 countries are members of this Geneva Convention.

## Tanks Taken To Libya

Nazis Able To Assemble Far Larger Number Than British

Though the British are still content of holding their own on the Egyptian-Libyan border, they privately admit concern over the fact that the Axis has arrayed more and better tanks against them, says Newsweek. New York. The exact number of tanks with the Axis forces isn't known, but the British have learned that the Nazis were able to bring to Libya some of their best machines and also have obtained, probably from French North Africa, a large number of modern tanks. The medium tanks, the only Allied units which proved effective in the Battle of France. The British can't afford to weaken their defenses by sending many heavy units to Egypt, and it will be several months before the British begin to receive new equipment on anything but light tanks.

## Scout Gift Cross

Awarded To Patrol Leader For Gallantry During Air Raid

William Turpin, 18-year-old Scout patrol leader who saved a mother and child and then recovered the baby's bottle during a raid, has been awarded the Scout gift cross for gallantry. When nurses failed to quieten the baby Turpin groped in a bomb crater and returned with the bottle and some clothes, all piled on a carriage.

## Women Roof-Thatchers

Roof-thatchers are greatly in demand. There are only about 200 first class thatchers in Great Britain and as many of them have joined the services their number is sadly depleted. Restoration of cottages for evacuees has led to a great boom in the trade. Women are now learning the art of thatching, instruction being given in schools established by local councils.

In spite of his Balkan victories, photographs of Hitler show him looking as sour as ever. Probably this is the result of getting up, morning after morning, on the wrong side of the Channel.

The largest postcard ever handled by the Salt Lake City postoffice was sent by the Utah Writers' Project. It measured 44 by 28 inches and 45 three-cent stamps were required to mail it.

Squirrels hoard nuts, but few remember where they hide them as a result whole forests spring up from unintentional plantings of provident squirrels.

The richest single oil field ever discovered lies in Iran.

## May Start A Fashion

English Viscount Says Winston Churchill Has Taken To Snuff

Most photographs of Winston Churchill show him smoking a cigar, says Viscount Castlereagh, but nevertheless he is nothing like such a heavy smoker as his great friend the late Lord Birenhead, who at 7:30 a.m. used to light a strong Havana cigar and enjoy it. Mr. Churchill does not usually smoke before lunch.

Lately he has taken to snuff, which may or may not start a fashion which has well-nigh died out. T. P. O'Connor used to sniff snuff and years ago the Beefsteak Club stocked snuff for members.

Twenty-five years ago Lord Beverbrook used to smoke cigars, then he took to cigarettes, now he does not smoke at all.

Hitler is a non-smoker and a non-drinker.

## Economics Of Farming

Investigators On Farm And Ranch Management

The Agricultural Economics Division, Dominion Department of Agriculture, serves as a fact-finding body in matters relating to production as well as to marketing. Designed to reduce costs, improve merchandising practices, and bring about a better understanding among producers, consumers, and the trade, the Division's activities include research and agronomy, cultural co-operation, investigations of farm and ranch management practices, costs of production, land utilization, farm mechanization, land settlement, types of farm products, distribution, methods and practices followed in handling farm products, and factors affecting consumption of agricultural products.

## Home Defence Needed!

The Common House Fly Preys Many Dangerous Infections

Every year we face an invasion—an enemy who spreads through our very homes and is responsible for causing more serious ailments and deaths than any we ever imagine. This enemy arrives regularly every year with the first warm days. It is our duty to stamp out this menace to health and to life itself just as quickly as he appears—from the manure heaps and rotting garbage where he has his breeding places. His name is known to us all—the common house fly!

Typhoid fever, the distressing number diarrhoea of infants, and other diseases are just a few of the many dangerous infections which the common house fly may spread through out your community. Its hairy body may carry as many as five million bacteria, and a single fly passing will multiply by the million in an amazingly short space of time if allowed to breed.

The enemy is too dangerous to risk using methods of exterminating him which are not completely certain. Of the few critical ones, only one is only temporarily effective as they merely "knock" him out for the time being.

Others are Dungen Grant and John Farleigh. Before the war British manufacturers relied largely on France for textile designs and the cotton board decided that to obtain future success in British export sales, fresh ideas and color must be found. Artists and young designers were approached and an exhibition resulted, at which more than 1,000 designs were exhibited.

## Means The Same Thing

Guerilla Is Spanish But Other Countries Have Them Too. "Comitad" bands of Serbians are still fighting the Germans. The word is commonly used in the Balkans for guerilla forces, and was originally from the French comite-committee. It was first applied to a member of a revolutionary committee who was to bands of irregulars. "Guerilla" is a Spanish diminutive form meaning a little war, and was originally used only in that sense.

## Wants Smaller London

Sentimental folk who want to rebuild London as it was before the blitz are "more dangerous than speculators," declared Capt. John Douglas, who hopes for new metropolis "considerably smaller."

## Ready To Serve

The Second Corps area recruiting office at New York announced receipt of a letter from a young woman who volunteered her services as a hostess on a U.S. Army bomber.

Iranians have discarded the turban and the veil.

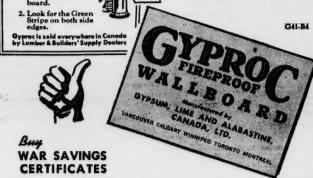

## BUY WITH YOUR EYES OPEN

Only GYPROC Fireproof WALLBOARD (Made From Gypsum Rock) Combines All These Advantages:

1. Lifetime Beauty with GYPROC No need to ever worry about walls and ceilings cracking, warping or sagging when you build them with GYPROC Wallboard. GYPROC against expensive repairs by demanding GYPROC when you build or remodel.
2. Double Fire Protection with GYPROC GYPROC Fireproof WALLBOARD is made from rock and will not burn. Equally important, GYPROC is fireproof and does not prevent any ordinary fire from spreading. It pays to demand the double safety of GYPROC for your home.
3. Unlimited Choice in Decoration, with GYPROC Only GYPROC WALLBOARD has the four bevelled edges, which permit joints to be filled, thus giving you perfectly smooth walls and ceilings. That's why only with GYPROC WALLBOARD can you have any choice in decorative treatment.

NOTE: Heavy duty wallboard not used for roof.

## Designs By Famous Artists

Britain To Use Them On Printed Cotton For Dresses

Smart women of Britain will soon be able to wear cotton frocks with printed designs which are the work of famous artists. Graham Sutherland, one of whose wartime jobs has been painting fire during raids for government department is among them. Others are Duncan Grant and John Farleigh. Before the war British manufacturers relied largely on France for textile designs and the cotton board decided that to obtain future success in British export sales, fresh ideas and color must be found. Artists and young designers were approached and an exhibition resulted, at which more than 1,000 designs were exhibited.

## Light Has Gone Out

France Has To Surrender Abjectly To Any Nazi Demand

The French people have no choice. They no longer are free to argue, to weigh the consequences of their government's policies, to criticize or protest; to find refuge, as their long-ago forbears did, in a revolution for their liberty. They must surrender, abjectly and as completely as Hitler will, for Britain and his Cabinet now are committed to collaboration in the "new order." The light has gone out in France and with it representative government and liberty. The democracies have one more threat to face.

## Signify Different Banks

Three stars on a Canadian officer signifies a captain and second-in-command of a company, but three stars in the U.S. army means lieutenant-general in command of a field army.

## A Greater Incentive

Following the recent declaration by President F. D. Roosevelt of the existence of an unlimited national emergency in the United States one may expect to read of frequent announcements of steps being taken, perhaps almost weekly, to stimulate the dovetailed objectives which inspired this important decision, namely the defence of the Western Hemisphere and aid to Britain.

The proclamation of the existence of a state of unlimited national emergency by the chief executive of the great neighboring nation, with its enormous industrial and natural resources and its strike manpower is bound sooner or later to exert a very profound effect upon the course of the war, an effect which probably will not be appreciated to the full until it can be viewed in perspective at a later date. And this prediction can safely be made when one realizes the enormous emergency powers which have been vested in the president by Congress and the depth and breadth of his conviction that the whole resources of the nation must be bent to the task, if democracy is to be saved from pagan Hitlerism and if the existence of civilization on this continent is to be preserved inviolate.

In some quarters disappointment was expressed that President Roosevelt was not more specific in his dramatic statement. Some people would have liked to hear him say that the declaration of the existence of a state of unlimited national emergency meant that he intended to take the necessary steps to bring about abrogation of the Neutrality Act; or that his country would furnish American convoys to ensure delivery of war materials on Britain's shores.

## All-Encompassing

This, however, was not necessary. The president's emphatic declaration that means must and would be devised to ensure that the production of American armaments, workshops and yards was delivered where it was intended to go was all-encompassing and that, in the light of Roosevelt's recent since the outbreak of the war should be sufficient assurance that whatever may be necessary to ensure that result will be made operative.

It must also be remembered that no one in the United States knows his people better than F.D.R. He knows just how far he can go without stepping beyond the boundaries of public opinion in his own country. He is evidently more keenly aware of the extent of the peril to the United States than are very many of his people and the primary purpose of his statements was to give the public confidence in the growing menace which threatens their liberty, their economic institutions and their spiritual existence. President Roosevelt knows precisely well that once the people of the United States realize the danger they are in and the very short time they may have which to prepare to meet it, on both sides of the Atlantic, public action will be immediately accorded any and all measures necessary to meet the situation.

When the speech is analyzed in the light of this interpretation of its objective, it can truly be described as an educational effort of the first magnitude and one may expect it to bear fruit in crystallization of public support and approval for far more advanced steps than have been taken to date, both in provision of additional assistance to Britain overseas and all-out preparation for home defence of the Western Hemisphere, in consolidation of national unity and in stiffening morale.

## To Greater Effort

Outside the boundaries of the United States, President Roosevelt's announcement is already having a valuable effect in democratic circles. For to the hard pressed and the oppressed it has brought realization that talk is to be rapidly translated into cumulative action, that promises, stated or implied, are to be implemented with increasing acceleration and that a real all-out effort with the full power of public opinion behind it is to be the order of the day, with nothing left to wonder at.

Such realization, however, is not to be construed as an invitation to Canadians to rest on their oars in the prosecution of their share in the fight against the preservation of a democratic civilization. The country, it should be an incentive to bend lower to the ears, to renew the burden with increased vigor and to marshal all the resources of men, money and materials to match a maximum effort.

With a full appreciation of the power and resources of the foe we are fighting should come an understanding that no matter how far the United States may go in the next few months or even years in assisting the combatting democracies, every last ounce of Canadian effort is needed to turn the scales of warfare in our favor.

With this knowledge and a full appreciation of the world wide aims of Nazism there will be no let up in the part that Canada is playing and must continue to play in the greatest and the most devastating conflict in all history.

## Japs Getting Skeptical

The Italian press warns the Japanese that the United States is plotting against them. There are signs that the Japanese are getting just a bit skeptical about friendly ties from their Axis partners.

## Found In Food

Everybody eats a little mercury every day. Nearly all common foods contain it, scientists at the University of Tennessee have learned, although as a rule the quantity is far too small to cause trouble. Its source probably is the soil where plants grow.

During 1939 Canada consumed 32,301,000 pounds of wool.

## SHE WAS MY FAVOURITE SOCIAL MENACE

"I thought I had a life-long victim when I dragged her down from socialite to social mope. Too much coffee and tea upset her—she became my best example of caffeine nerves. Then she switched to Postum and soon after she started the thirty-day Postum teaheer (irritability) vanished. Once again she became the town's popular social leader and Caffeine Nerves had no more to do with it."

Some people, and all children should never drink coffee or tea. Caffeine is a stimulant, it causes sleeplessness, headaches or indigestion, much to the detriment of the health. Postum is a healthy food, it is not a stimulant, it is a food. Postum today from your grocer.

POSTUM

## Commercial Printing

Do not try to economize on necessary expenses. Neatly printed business stationery is just as important to your business as any other of your necessary expenses, and it is poor economy to do without it. Blank writing paper and forms on which your name is written in with ink do not raise the prestige of your business. And if it's economy that you want, see us and find that our new prices are most reasonable.

### NEW CROP DELIVERIES

*Producers! Why Worry?*

Consult our agent now regarding your 1941 permits, and all other marketing problems

**PIONEER GRAIN COMPANY LIMITED**

### HOW MUCH TO INVEST

How much should one subscribe to the Victory Loan?

The Finance Minister for Canada declares as a national principle for this national emergency:

"Subscribe your liquid resources and also part of what you can secure on your credit."

A company should subscribe what it has free in its liquid resources, and from one-half to all its anticipated earnings for the next eleven months, allowing for taxes.

This loan cannot succeed without the subscriptions of ALL INDIVIDUALS, great and small.

An individual should subscribe his free liquid resources from his savings account or elsewhere, plus what can be raised by the use of credit and the subscription of anticipated savings.

We buy luxuries on the installment plan. Why not buy safety and honor on credit?

Let's adjust our habits and sacrifice fittingly for those who risk all for us

and—  
Show everyone that in every respect we have what it takes!

### RENEW BOUNTIES FOR WOLVES AND COUGARS

Renewal of the payment of bounties on timber wolves and cougars this year has been authorized in an order-in-council passed by the provincial government.

The scale of bounties is as follows: For every timber wolf taken, \$16; for every pup wolf born before July 1, \$5. For every cougar, \$50. Bounties are payable to persons who are residents of the province.

### WRONG GAS—FINED \$5

The first conviction under the Alberta Fuel Oil Tax Act of a farmer for using purple gasoline in his motor car has been obtained, when a farmer in the Leduc district was prosecuted by the R.C.M.P. and fined \$5 and costs and his car was impounded for a period of 14 days.

### LIGHTS OF LEARNING GO OUT

(The Ottawa Journal)

The Rockefeller Foundation does—or tries to do—a world-wide work in public health, education, the sciences and the humanities. It has a trust fund of some \$145,000,000, and last year spent \$9,544,000—spent it, despite the war, in 44 countries of Europe, Asia, Africa and the Americas.

Reviewing the work of the Foundation for 1940 Mr. Raymond B. Fosdick its president, writes sadly on "these unhappy days."

"To sit by and watch the disappearance or decadence or, worse, the perversion of institutions of learning which in earlier and better years we were privileged to assist is not an easy assignment."

Institutions in Poland, in Czechoslovakia, in Germany itself, which gave high promise of great work for humanity, have been closed. Brilliant men with whose work the Foundation was associated have been driven—in Mr. Fosdick's words—from the parts for which they were trained, debarred from their laboratories, "some of them fugitives, some in concentration camps and many of them separated from their families or lost in foreign countries where they sought haven."

"In the shadows that are deepening over Europe," notes Mr. Fosdick, "the lights of learning are fading one by one."

On the continent, as distinguished from Great Britain, the situation during the last year has rapidly deteriorated. January, 1941, finds a large number of universities and institutions closed, and many others working under conditions scarcely tolerable.

"As German forces have moved into one country after another a definite pattern has been followed in relation to the universities and other schools. "Allowed at first to continue with their work, their teaching and student activities were closely supervised by the German authorities. The supervi-

lon involved an attempt to enforce a "cultural program" similar to that imposed by the Nazis on German institutions.

"Where this attempt was resisted, as it frequently was, the measures of repression adopted by the occupying authorities included the closing of the institutions, sending faculties to concentration camps, and even breaking up student demonstration with machine guns and tanks."

In Czechoslovakia hundreds of students were imprisoned, many were shot, many deported to Germany for forced labor. The German attitude toward Polish Universities was one of murder and suppression. In Holland, in Belgium, in Norway, there were arrests, deportations, disappearances. In Paris students who staged a demonstration were machine-gunned by the Germans. "The condition of university life and standards on the continent," says Mr. Fosdick in summing up, "is now little short of appalling."

### FREIGHT RATES IN CANADA LOWER THAN ANY OTHER COUNTRY EXCEPT JAPAN

Although Canadian railways buy their supplies at an average of 25 per cent greater than the cost to United States lines, Canada's average per ton mile freight rate is lower than in any country in the world except Japan, where employees are paid a few cents per day, stated R.C. Vaughan, vice-President, Packaging Stores and Steamships, C.N.R., who was the guest speaker at the recent dinner gathering of the Medical and Surgical Section of the Association of American Railways in Montreal.

Colonel: "Am I in time for the express—has it left yet?"

Stationmaster: "Take your time, sir, it's a few minutes late."  
"Late? It's disgraceful the way the railways are run!"

We can't all be in the front line,  
but we can  
Serve By Saving and Buying  
War Savings Certificates

### BRITISH AGRICULTURE

Since the war started 3,750,000 acres of grassland in Britain have been plowed up. A revolution in farming practice has taken place, but it has been difficult to get the British farmers to change their practices and adopt modern methods. To overcome this, agricultural committees have been established in the various counties to instruct and advise on modern methods of farming. In order to aid agricultural research an additional government grant has been made, and the best brains of the scientific world

employed. All these efforts are aimed at making Great Britain increasingly self-supporting and reducing dependence on imports and shipping.

Mr. Merchant: If your stock of counter sales books is getting low why not order a new supply now before prices advance? Delivery can be made at any date up to 30 days and the placing of your order now will protect you against a price rise. You save nothing by ordering through a travelling salesman—our prices are positively the lowest and express charges are prepaid.—The Carbon Chronicle.

## HELPING OURSELVES

Here and there throughout the Dominion of Canada, some citizens have allowed themselves to become bewildered by large figures which represent the costs of this War to Canada. Apparently, they scan the headlines, note the billions of dollars which are being spent to fight Hitler, and then sit back and mope something of this kind:

"How in the world will the Government of Canada ever find the money to repay the people who have invested in War Savings Certificates and War Loan Bonds?"

What some of these people overlook is the fact that the Government of the country was not fooling when it declared that Canada would operate on a "Pay as you go" policy.

There was one point which the Mi-

nister of Finance brought out in his Budget Speech on April 29, 1941, that should be re-emphasized to allay foolish fears. The Minister reported that, including the assistance which this country is giving Great Britain, Canada in this fiscal year are providing for their tax payments and other Government Revenues, 79 per cent of our War and non-War budgetary expenses. A very great measure of control over the amount of debt being piled up for future payment.

In the light of conditions all over the world, it is not too extravagant to say that the security behind Canada's War Savings Certificates and War Loan Bonds is just about the best in the world today.

The only real threat against this security is a victory for Hitler. Buy War Bonds now and make sure this threat is alleviated by providing money for necessary equipment to exterminate a dangerous enemy.

## WHY MEN LEAVE HOME

(By Bruce Burton)

One hot summer evening I dropped into a club and discovered a well-known playwright and an equally well-known composer. Knowing that each of them had a cool and beautiful place in the country, I expressed surprise. "You wonder why I am here," said the dramatist. "So does my wife. She

thinks I'm crazy to leave a lovely home for a hot little cell in this club. Moreover she resents my absence as an implied criticism of her own charm and power to keep me happy.

"The truth is that when I'm working on a play I can stand the pleasure of home life just about as long, and then I simply have to go. No matter how lovely the children are, they do interrupt. And wifely attention and the ministrations of friends are nothing but a nuisance when you are driving your mind as hard as it will go. I can get more done in this little bare room than I can ever do in my beautiful home."

The composer said, "Me, too," and I myself had to confess that I was in town for much the same reason.

In a magazine I read some very interesting reminiscences of the philosopher William James, set down by Mrs. Evans, a long time friend.

"With the happiest and most harmonious family to be imagined, William James was nevertheless a perpetually restless and unsatisfied soul," said Mrs. Evans. "Now and again he would rebel, and exclaim, 'I am going away for a fortnight to be alone with God, after so much family immersion and unfulfilled household responsibilities.'"

On one occasion, when a large party was being entertained in his home, he bowed suddenly out of the parlour, seized an unsuspecting undergarment by the shoulders and cried: "This place is hell. This is the way out." And he

hurried the dazed youngster through the back door.

Man is a strange animal, carrying beneath his civilized surface all of the instincts of his savage days. One of these instincts is the powerful yearning to be at home with the women and children he loves. Another, equally powerful is the urge to be away by himself, as his savage ancestor went away, into the deep woods.

Foolish wives feel hurt and resentful when this second instinct asserts itself. They protest, break into tears, and are generally unpleasant.

The wise wife smiles and says, "Go, my darling," and knows that the quicker he goes the more glad he'll be to come back.

ROCKY MOUNTAIN LAKE  
58 MILES OF SHORE LINE

Maligne Lake in Jasper National Park is the largest glacial lake in the Canadian Rockies. It has a shore line of 58 miles and varies in width from 300 yards to two miles. Maligne Lake Chateau at an elevation of 5,500 feet commands full view of the lake and of the imposing peaks in the Maligne group, the highest of which, Mount Brazeau, rises 11,380 feet.

"SHOOTING AT JASPER"  
A BIG SCALE AFFAIR

There will be considerable "shoot-

ing" at Jasper National Park this season. While some of it may be "explosive" none of it will require firearms. The first "shooting" will begin in mid-June when Canadian and U.S. camera enthusiasts will gather under direction of Ivan Dmitri, color camera expert, with an opportunity of widening their picture skill. The second "shooting" will begin August 31 with the opening of the 18th annual Totem Pole Golf Tournament for which 150 entries have already been received.

Alberta's tourist industry this year shows signs of reaching new heights, judging by the returns from the three main National Parks. Banff reports a 400 per cent increase in traffic over the 1940 period, and the trend is reflected at all vacation points. In Waterton Lakes during May, 1940, a total of 1,549 cars and 5,147 passengers entered, compared with 1,555 cars and 7,592 passengers this year. During the period from January to May 31, Banff entertained 14,112 cars and 46,007 passengers this year, compared with 8,649 cars and 26,389 passengers in the preceding period. Jasper reports this year's trade increased with 447 cars and 1,783 passengers in May, compared with 360 cars and 731 passengers in May, 1940.

"IF YOU SEE ANYBODY  
LOOKING FOR A GOOD BULL,  
I'VE GOT ONE FOR SALE"

Pussing the word along to your neighbors that you have a bull, or a horse, or a hundred bushels of seed oats for sale, is advertising.

If you wanted to give your advertising message wider distribution, you'd have it printed in the local paper.

That is exactly what the advertisers are doing in this issue—letting it be known what they have to market. They can't afford to misrepresent their merchandise, because the news of sharp practice soon gets around. To continue selling, an advertiser must have a reputation for honest dealing. He is entitled to an honest profit as long as he gives the purchaser his money's worth.

Advertising continues to be useful because it renders a service, both to the seller and the buyer. It pays to advertise . . . and it pays to read the other fellow's advertisement.

THE CARBON CHRONICLE

To Every Mother Wife and Sweetheart  
.. Beware of the Vanishing Atlantic!

HELP TO KEEP THE "FRONT LINE"  
AWAY FROM YOUR DOORSTEP

Urge Your Menfolk to Buy  
Victory Bonds NOW

You can no longer depend upon the Atlantic Ocean for protection. Any day between breakfast time and noon, a bombing plane can fly from Greenland to our own Maritimes and Quebec—a mere matter of 5 hours; to Winnipeg in less than 9 hours; to Vancouver in 10½ hours. From German-occupied France, bomb-laden planes can carry destruction to Toronto, Niagara, Ottawa and Montreal in less than 10 hours. Night and day, in the British Isles and on the sea, in and out of uniform, men defend your home from attack as surely as though they stood and fought at your own doorstep. Will you help to supply them with tools to carry on the fight—your fight? Will you help to make certain that there shall never be an "occupied" Canada?

Your Government needs some of your savings to buy more ships, planes and tanks—munitions of war that will hurry the return of our men to their homes, insure our way of life. Lend your money by buying Victory Bonds NOW. The money you invest in Victory Bonds will come back to you with interest. Lend your money. We must win this war. Lend to preserve the things that money cannot buy. Urge your menfolk to protect your home by investing in Victory Bonds now. All that you hold dear is threatened.

## HOW TO BUY

Give your order to the canvasser who calls on you. Or place it in the hands of any branch of any bank, or give it to any trust company. Or send it to the local Victory Loan Headquarters. Bonds may be bought in denominations of \$50, \$100, \$500, \$1,000 and larger. Canvasser, bank, trust company or your local Victory Loan Headquarters will be glad to give you every assistance in making out your order form.

## LOCAL NEWS

Dr. George Casper arrived from Edmonton this week and is visiting in the Carbon district with Mr. and Mrs. H.M. McNaughton.

Chas. Smith is opening up the gravel pit on the island and has the contract to gravel the Village streets. Local drymen will do the hauling.

Don't forget the L.O.D.E. dance on Monday, June 20th.

Mr. and Mrs. Emil G. Ohlhauser and son, and Mr. and Mrs. Bill Betcher left this week on a two weeks holiday at Banff and the Coast.

Your King and Country Needs You. Enlist for Active Service.

Mr. and Mrs. Fred G. Ohlhauser, Mr. and Mrs. Martin Betcher and Mr. Emil Betcher left Tuesday on a holiday trip to Saskatchewan points.

The drawing for the hand painted picture, on which tickets have been sold by the Hesheth Red Cross, will be held at the Red Cross dance at Hesheth on Friday, June 20th.

Pte. Geo. Applegard of the Canadian Ordnance Corps, stationed at Camp Detrick, Nova Scotia, arrived home on June 11th and spent a week in Carbon district. He left for the East Wednesday morning.

This is a battle for your homes and rights—Enlist Now.

Mrs. Clarence Green of Calgary returned home Sunday after spending a few days in Carbon visiting with her aunt, Mrs. M.J. Elliott.

J.H. Olyphant was a Calgary visitor Tuesday and Wednesday of this week.

Const. and Mrs. F.A. Amy returned to Carbon last week after a three weeks vacation, part of which was spent in the Okanagan district of B.C.

Mr. J.S. Burnett and Miss Vida Burroughs left for their home in Lansing, Mich., after spending a few days in Carbon visiting with Mr. and Mrs. W. Leitch.

Archib. McLeod returned Friday after attending the Postmaster's convention in Calgary and Banff.

C. Olyphant and Ed Martin left on Tuesday and will spend a few days in the Edmonton district.

Jas. Flaws and son David were in Calgary Saturday attending a convention of Massey-Harris dealers.

Ordinary Seaman Bill Olinhart left Tuesday for Esquimaut, B.C., where he will continue his training.

Mrs. Myrtle Pickard spent the first of the week in Calgary.

Pte. Stanley Ramsay spent the week end visiting with friends in Carbon.

The Victory Loan Flag is again unfurled over the Post office after being down for a few days, due to a broken rope, and volunteers for the repair job were few and far between, especially when it was known that the flag pole had to be "shinned" in order to put in the new cord.

Dr. K.W. Neathy  
Breeder, Agricultural Department  
North-West Line Elevator Association

## Line Elevator Exhibit

The North-West Line Elevators Association exhibit, now prepared as an institution at "B" class fairs, will be covering the circuit again this season. "A" class exhibitions at Brandon, Calgary, and possibly Regina, will also be included.

The central feature of this year's display will illustrate, by mechanical devices, the problem of controlling wind and water erosion of soil. Artificial dust and rain storms will illustrate the damage to soils from these causes. Adjacent to the damaged fields will be contrasting scenes showing the results obtained when control methods are applied. This portion of the exhibit will occupy the entire back section. On one end will be displays featuring production factors to include information on weeds, insects, plant diseases and fertilizers. The other end will contain exhibits illustrating the production of grass and legume crops, the problem of grain mites in farm granaries, and the grading of grain.

Talking moving pictures will be shown in the exhibit as an added attraction.

This will be the fourth year in succession for The North-West Line Elevators Association exhibit to be shown at "B" class exhibitions. The purpose of the exhibit this year is identical with that of former years. That is, to present something which it is hoped will be both informative and entertaining to farmers and their families spending a holiday at the fair. You are cordially invited to visit our exhibit.

## Snicklefritz-----

"Johnny, I'll have you behave yourself when you're at home. What would your teacher say if you acted like that at school?"

"She'd say 'Behave yourself—remember, you're not at home now!'"

"You don't make very good music with that instrument," said a bystander to the man with the bass drum, as the band ceased to play.

"No," admitted the drumponder. "I know I don't; but I drown out a heap of bad music!"

A small boy sat at the side of the road, sobbing pitifully. An old gentleman who came along was very touched by the tears.

"What's the matter, little man?" he asked.

"I—I'm afraid to go to school," the youngster replied.

"Oh, it isn't that," said the older fellow. "Haven't you been a good boy?"

"Oh, it isn't that," said the youngster. "You see, my sister jilted the schoolmaster yesterday."

Edmonton district needs rain badly for two reasons; the first because the crops are drying up, and the second because of the caterpillar invasion. Threatened for two years now, the plague of leaf-eating pests is wiping out the verdancy of many city garden spots.

Soft drink sellers were warned by W.D. King, who is a member of the Price Spreads Board as well as Deputy Minister of Trade and Industry,

**BREAD helps to keep Canadians Strong... Vital**

BREAD contributes to the most important nutritional need—in large part helps to give Canada its high health record.

Delicious, nourishing bread supplies one-fourth of the food energy of Canadians.

Its rich carbohydrate content sees it the best and cheapest source of human fuel. And, made with its usual present-day milk formula, bread is also an important source of protein, equal to meat in maintaining muscular energy.

Eat more bread—and meet today's emergencies with greater vitality and energy!

YOUR BAKERY'S BREAD, scientifically equipped—scientifically—finest ingredients—give you a loaf unsurpassed in wholesomeness and delicious flavor.
